

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 2015/830. - United Kingdom (UK)

## SAFETY DATA SHEET

## **Reducer T0002 Fast Spray**

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

#### 1.1 Product identifier

Product name

**Product code** 

: Reducer T0002 Fast Spray

: OT0002

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

| Identified uses                               |        |  |
|---|--------|--|
| Professional application of coatings and inks |        |  |
| Uses advised against                          | Reason |  |
| All Other Uses                                |        |  |

#### 1.3 Details of the supplier of the safety data sheet

| Netional contact                                     |                              |
|--|------------------------------|
| e-mail address of person<br>responsible for this SDS | : sdsfellinguk@akzonobel.com |
| Tel: +44 (0)191 469 6111                             | Fax: +44 (0)191 438 3711     |
| Tyne and Wear<br>NE10 0JY UK                         |                              |
| Gateshead  |                              |
| Felling  |                              |
| International Paint Ltd.<br>Stoneygate Lane          |                              |
|  |                              |

## National contact

#### 1.4 Emergency telephone number

| National advisory body/F | Poison Centre (For use only by lice | ensed medical professionals.) |
|--------------------------|-------------------------------------|-------------------------------|
| Telephone number         | : +44 (0)344 892 0111 (UK)          | +353 (0)1 809 2566 (Eire)     |
| <u>Supplier</u>          |                                     |                               |
| Telephone number         | : +44 (0)191 469 6111 (24H)         |                               |

## **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

## Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 2, H225 Eye Irrit. 2, H319 STOT SE 3, H336

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

## 2.2 Label elements

## **SECTION 2: Hazards identification**

| Hazard pictograms   |   |
|---|---|
| Signal word   | : Danger  |
| Hazard statements   | <ul> <li>Highly flammable liquid and vapour.</li> <li>Causes serious eye irritation.</li> <li>May cause drowsiness or dizziness.</li> </ul>   |
| Precautionary statements  |   |
| General   | : Not applicable.   |
| Prevention  | : Wear protective gloves. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use only outdoors or in a well-ventilated area. |
| Response  | : IF INHALED: Remove person to fresh air and keep comfortable for breathing. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower.                   |
| Storage   | : Keep cool.  |
| Disposal  | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Hazardous ingredients   | : butanone  |
| Supplemental label<br>elements  | :   |
|   | Wear appropriate respirator when ventilation is inadequate.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.   |

| 2.3 Other hazards                                   |   |             |
|---|---|-------------|
| Other hazards which do not result in classification | : | None known. |

## **SECTION 3: Composition/information on ingredients**

| 3.2 Mixtures               | : Mixture  |                |   |             |         |
|----------------------------|--|----------------|---|-------------|---------|
| Product/ingredient<br>name | Identifiers  | % by<br>weight | <u>Classification</u><br>Regulation (EC) No.<br>1272/2008 [CLP]               | Nota<br>(s) | Туре    |
| butanone                   | REACH #:<br>01-2119457290-43<br>EC: 201-159-0<br>CAS: 78-93-3<br>Index: 606-002-00-3 | ≥90            | Flam. Liq. 2, H225<br>Eye Irrit. 2, H319<br>STOT SE 3, H336<br>EUH066         | 6           | [1] [2] |
|                            |  |                | See Section 16 for the<br>full text of the H<br>statements declared<br>above. |             |         |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

## **SECTION 3: Composition/information on ingredients**

#### Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures General : In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and seek medical advice. Eye contact Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice. Inhalation : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Seek medical attention. Skin contact : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Seek medical attention if irritation persists. Do NOT use solvents or thinners. Ingestion : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting. Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

#### 4.2 Most important symptoms and effects, both acute and delayed

# Potential acute health effectsEye contact: Causes serious eye irritation.Inhalation: Can cause central nervous system (CNS) depression. May cause drowsiness or<br/>dizziness.Skin contact: No known significant effects or critical hazards.Ingestion: Can cause central nervous system (CNS) depression. Irritating to mouth, throat and<br/>stomach.

#### **Over-exposure signs/symptoms**

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
|--------------|--|
| Inhalation   | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>muscle weakness<br>unconsciousness |
| Skin contact | : No specific data.  |
| Ingestion    | : No specific data.  |

#### 4.3 Indication of any immediate medical attention and special treatment needed

08/03/2022

| Notes to physician  | : Treat symptomatically. Contact poison treatment specialist immediately if large |
|---------------------|---|
|                     | quantities have been ingested or inhaled.   |
| Specific treatments | : No specific treatment.  |

## **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                           |      |   |  |  |
|---|------|---|--|--|
| Suitable extinguishing media                      | :    | Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |  |  |
| Unsuitable extinguishing media                    | :    | Do not use water jet.   |  |  |
| 5.2 Special hazards arising                       | from | the substance or mixture  |  |  |
| Hazards from the substance or mixture             | :    | Highly flammable liquid and vapour. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.   |  |  |
| Hazardous thermal decomposition products          | :    | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide  |  |  |
| 5.3 Advice for firefighters                       |      |   |  |  |
| Special protective actions for fire-fighters      | :    | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.                                      |  |  |
| Special protective<br>equipment for fire-fighters |      | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |  |  |

## **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

| · · · ·                        |  |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.   |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| 6.3 Methods and material for   | containment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |

## **SECTION 6: Accidental release measures**

# 6.4 Reference to other sections

- : See Section 1 for emergency contact information.
- See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 7.1 Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Do not ingest.<br>Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Use<br>only with adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Do not enter storage areas and confined spaces unless adequately<br>ventilated. Keep in the original container or an approved alternative made from a<br>compatible material, kept tightly closed when not in use. Store and use away from<br>heat, sparks, open flame or any other ignition source. Use explosion-proof electrical<br>(ventilating, lighting and material handling) equipment. Use only non-sparking tools.<br>Take precautionary measures against electrostatic discharges. Empty containers<br>retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Vapours are heavier than air and may spread along floors. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

| 7.3 Specific end use(s)    |                  |
|----------------------------|------------------|
| Recommendations            | : Not available. |
| Industrial sector specific | : Not available. |
| solutions                  |                  |

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredie                     | ent name  | Exposure limit values   |
|--------------------------------------|---|---|
| butanone                             |   | EH40/2005 WELs (United Kingdom (UK), 12/2011). Absorbed<br>through skin.<br>STEL: 899 mg/m <sup>3</sup> 15 minutes.<br>STEL: 300 ppm 15 minutes.<br>TWA: 600 mg/m <sup>3</sup> 8 hours.<br>TWA: 200 ppm 8 hours.  |
| Recommended monitoring<br>procedures | atmosphere or l<br>of the ventilation<br>protective equip<br>the following: E<br>the assessment | ontains ingredients with exposure limits, personal, workplace<br>biological monitoring may be required to determine the effectiveness<br>n or other control measures and/or the necessity to use respiratory<br>oment. Reference should be made to monitoring standards, such as<br>European Standard EN 689 (Workplace atmospheres - Guidance for<br>t of exposure by inhalation to chemical agents for comparison with<br>measurement strategy) European Standard EN 14042 (Workplace |
| nte of issue/Date of revision        | : 08/03/2022  | 2 AkzoNobel   |

| <b>SECTION 8: Exposure</b>              | e controls/personal protection   |
|---|--|
|   | atmospheres - Guide for the application and use of procedures for the assessment<br>of exposure to chemical and biological agents) European Standard EN 482<br>(Workplace atmospheres - General requirements for the performance of procedures<br>for the measurement of chemical agents) Reference to national guidance<br>documents for methods for the determination of hazardous substances will also be<br>required.  |
| DNELs/DMELs<br>No DNELs/DMELs available |  |
| PNECs                                   |  |
| No PNECs available                      |  |
| 8.2 Exposure controls                   |  |
| Appropriate engineering controls        | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
| Individual protection measured          | <u>'es</u>   |
| Hygiene measures                        | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |
| Eye/face protection                     | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. Use eye protection according to EN 166, designed to protect against liquid splashes. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                         |  |
| Hand protection                         | : Use chemical resistant gloves classified under Standard EN 374: Protective gloves against chemicals and micro-organisms. Recommended: Viton® or Nitrile gloves. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/ specifications provided by the glove supplier. Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred. |
| Body protection                         | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.EN ISO 13688 When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves Refer to European Standard EN 1149 for further information on material and design requirements and test methods.  |
| Other skin protection                   | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Date of issue/Date of revision          | : 08/03/2022 AkzoNobel   |

## **SECTION 8: Exposure controls/personal protection**

| Respiratory protection          | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary according to EN529. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. |
|---------------------------------|--|
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to<br>ensure they comply with the requirements of environmental protection legislation.<br>In some cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.      |

## **SECTION 9: Physical and chemical properties**

## 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>                               |   |   |
|---|---|---|
| Physical state                                  | : | Liquid.   |
| Colour  | : | Colourless.   |
| Odour   | : | Solvent.  |
| Odour threshold                                 | : | Not available.  |
| рН  | : | Not applicable.   |
| Melting point/freezing point                    | : | Not available.  |
| Initial boiling point and<br>boiling range      | : | Lowest known value: 79.59°C (175.3°F) (butanone).         |
| Flash point                                     | : | Closed cup: -6°C  |
| Evaporation rate                                | : | Not available.  |

| Explosive properties                            | : | Not available.  |
| Oxidising properties                            | : | Not available.  |
|   |   |   |

#### 9.2 Other information

No additional information.

| SECTION 10: Stability and reactivity    |   |          |  |  |
|---|---|----------|--|--|
| 10.1 Reactivity                         | : No specific test data related to reactivity available for this product or its ingredie  | ents.    |  |  |
| 10.2 Chemical stability                 | : The product is stable.  |          |  |  |
| 10.3 Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur  | <b>.</b> |  |  |
| 10.4 Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, v braze, solder, drill, grind or expose containers to heat or sources of ignition. | veld,    |  |  |
| Date of issue/Date of revision          | : 08/03/2022  |          |  |  |

## **SECTION 10: Stability and reactivity**

: Reactive or incompatible with the following materials: oxidizing materials

**10.6 Hazardous** : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

#### Acute toxicity

| Product/ingredient name | Result                   | Species | Dose                     | Exposure |
|-------------------------|--------------------------|---------|--------------------------|----------|
| butanone                | LD50 Dermal<br>LD50 Oral |         | 6480 mg/kg<br>2737 mg/kg | -        |

**Conclusion/Summary** : Not available.

#### Irritation/Corrosion

| Product/ingredient name | Result                   | Species | Score | Exposure                   | Observation |
|-------------------------|--------------------------|---------|-------|----------------------------|-------------|

| Potential acute health effects |   |   |
|--------------------------------|---|---|
| Eye contact                    | : | Causes serious eye irritation.  |
| Inhalation                     | : | Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.       |
| Skin contact                   | : | No known significant effects or critical hazards.   |
| Ingestion                      | : | Can cause central nervous system (CNS) depression. Irritating to mouth, throat and stomach. |

## **SECTION 11: Toxicological information**

## Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
|--------------|--|
| Inhalation   | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>muscle weakness<br>unconsciousness |
| Skin contact | : No specific data.  |
| Ingestion    | : No specific data.  |

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

| Short term exposure            |   |
|--------------------------------|---|
| Potential immediate effects    | : Not available.                                    |
| Potential delayed effects      | : Not available.                                    |
| Long term exposure             |   |
| Potential immediate<br>effects | : Not available.                                    |
| Potential delayed effects      | : Not available.                                    |
| Potential chronic health effe  | ects  |
| Not available.                 |   |
| Conclusion/Summary             | : Not available.                                    |
| General                        | : No known significant effects or critical hazards. |
| Carcinogenicity                | : No known significant effects or critical hazards. |
| Mutagenicity                   | : No known significant effects or critical hazards. |
| Teratogenicity                 | : No known significant effects or critical hazards. |
| Developmental effects          | : No known significant effects or critical hazards. |
| Fertility effects              | : No known significant effects or critical hazards. |

#### Other information

: Not available.

## **SECTION 12: Ecological information**

#### 12.1 Toxicity

| Product/ingredient name | Result           | Species  | Exposure                         |
|-------------------------|------------------|--|----------------------------------|
| butanone                | Fresh water      | Algae - Skeletonema costatum<br>Daphnia - Daphnia magna -<br>Larvae<br>Fish - Gambusia affinis - Adult | 96 hours<br>48 hours<br>96 hours |
| Conclusion/Summary      | : Not available. |  |                                  |

## 12.2 Persistence and degradability

Conclusion/Summary : Not available.

#### 12.3 Bioaccumulative potential

| Product/ingredient name | LogPow | BCF | Potential |
|-------------------------|--------|-----|-----------|
| butanone                | 0.3    | -   | low       |

## **SECTION 12: Ecological information**

| 12.4 Mobility in soil                     |                  |
|---|------------------|
| Soil/water partition<br>coefficient (Koc) | : Not available. |
| Mobility                                  | : Not available. |

| 12.5 Results of PBT and vPvB assessment |                   |  |
|---|-------------------|--|
| PBT                                     | : Not applicable. |  |
| vPvB                                    | : Not applicable. |  |

**12.6 Other adverse effects** : No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| <u>Product</u>      |   |
|---------------------|---|
| Methods of disposal | <ul> <li>The generation of waste should be avoided or minimised wherever possible.<br/>Disposal of this product, solutions and any by-products should at all times comply<br/>with the requirements of environmental protection and waste disposal legislation<br/>and any regional local authority requirements.<br/>Dispose of surplus and non-recyclable products via a licensed waste disposal<br/>contractor. Waste should not be disposed of untreated to the sewer unless fully<br/>compliant with the requirements of all authorities with jurisdiction.</li> </ul> |
| Hazardous waste     | : The classification of the product may meet the criteria for a hazardous waste.  |

#### European waste catalogue (EWC)

| Code number         | Waste designation   |  |
|---------------------|---|--|
| EWC 08 01 11*       | waste paint and varnish containing organic solvents or other hazardous substances   |  |
| Packaging           |   |  |
| Methods of disposal | <ul> <li>Dispose of containers contaminated by the product in accordance with local or<br/>national legal provisions. This material and its container must be disposed of as<br/>hazardous waste. Dispose of via a licensed waste disposal contractor.</li> </ul>   |  |
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |  |

#### Notice to reader

IMPORTANT NOTE: the information contained in this data sheet (as may be amended from time to time) is not intended to be exhaustive and is presented in good faith and believed to be correct as of the date on which it is prepared. It is the user's responsibility to verify that this data sheet is current prior to using the product to which it relates.

Persons using the information must make their own determinations as to the suitability of the relevant product for their purposes prior to use. Where those purposes are other than as specifically recommended in this safety data sheet, then the user uses the product at their own risk.

MANUFACTURER'S DISCLAIMER: the conditions, methods and factors affecting the handling, storage, application, use and disposal of the product are not under the control and knowledge of the manufacturer. Therefore the manufacturer does not assume responsibility for any adverse events which may occur in the handling, storage, application, use, misuse or disposal of the product and, so far as permitted by applicable law, the manufacturer expressly disclaims liability for any and all loss, damages and/or expenses arising out of or in any way connected to the storage, handling, use or disposal of the product. Safe handling, storage, use and disposal are the responsibility of the users. Users must comply with all applicable health and safety laws.

## **SECTION 16: Other information**

Unless we have agreed to the contrary, all products are supplied by us subject to our standard terms and conditions of business, which include limitations of liability. Please make sure to refer to these and / or the relevant agreement which you have with AkzoNobel (or its affiliate, as the case may be). © AkzoNobel
